

"Where do the ordered pairs go?"

Name _____ Date _____ # _____

Plotting Away

Directions: Teresa Tesla has just finished rearranging her laboratory. To make it easier to find her equipment she has developed a coordinate system to locate her supplies. Below are the locations of some of her equipment. Once you determine the location of the items she has already placed in the room, help Teresa place the remaining items in the room.

What is the location of the:

- Desk _____
- Coffee maker _____
- Chemical cabinet _____
- Trash can _____
- Goggles _____

Place the following items in the correct spot.

- Microscope at (7,1)
- Chair at (5,1)
- Clock at (4,0)
- Computer at (5,7)
- Sink at (8,4)

Plot three more things you think Teresa might need in her laboratory and write the coordinates below.
