

“How many ways can you say the same number!?!?”

Name _____ Date _____ # _____

Thirteen is 13 is 10 + 3

Directions: Fredrick Fahrenheit must learn to communicate his results in different ways. Some of his friends like to work with numbers while other like to work with words. Help Fredrick rewrite the following results by converting them into written, standard, and expanded form.

Write the following numbers in standard form.

- 1. $4,000 + 300 + 50 + 2 =$ _____
- 2. four hundred seventy-eight = _____
- 3. $30,000 + 800 + 7 =$ _____
- 4. two thousand, one hundred five = _____
- 5. three hundred sixty-nine thousand, forty-three = _____

Write the following numbers in written form.

- 6. $700 + 60 + 4 =$ _____
- 7. $529 =$ _____
- 8. $90,000 + 700 + 30 =$ _____
- 9. $86,045 =$ _____
- 10. $7,941 =$ _____

Write the following numbers in expanded form.

- 11. $47,838 =$ _____
- 12. six hundred thirty-seven = _____
- 13. $109,852 =$ _____
- 14. sixty-five thousand, two hundred eleven = _____
- 15. seven thousand, eight hundred three = _____

Create a number that extends out to the ten thousands place value that has no more than two zeros in it. Write the number in standard, written, and expanded form.
